VET Empowerment through innovative and inclusive Learning Approaches

Let's talk about VELA

The VELA project stands against the educational crisis, supporting the VET providers in using innovative approaches and digital technologies for teaching and learning. Educators will be empowered with tangible tools to enrich their cultural background and to support a comprehensive approach to innovation, and the use of digital technologies for pedagogical, technical, and organisational change. VELA will contribute to the implementation of the "Digital Education Action Plan" promoting the effective use of the self-reflection tool and the exchange of good practices with other European stakeholders, cooperating to achieve flexible and permeable learning pathways.

SUPPORT VET PROVIDERS STRENGTHEN VULNERABLE GROUPS BUILD A SUSTAINABLE AND RESILIENT SOCIETY

PROJECT RESULTS

Manual: Analysis of the "VELA" field of action and Exploitation of Best Practices

Presentation of the current and prospect shapes of inclusive digital education methods and skills upgrade through digital tools to potential and current professionals in the market and to discuss the gaps in these fields and the needs of the target groups in the partner countries and the EU.

E-book: How to increase the quality of e-learning, keep concentration high during long online sessions and gamification resources

The E-book will provide interactive technological features created to show signs of progression/motivational methods, collaboration methods, and ensure transferability is concrete for the students and instructors.

Moodle platform: Digital Accessibility to support VET educators in involving people with disabilities in eLearning

A platform that will contain the necessary tools to strengthen the capacity of instructors to offer accessible e-learning courses and materials to serve as inclusion of those coping with disability or special needs.

European framework for the provision of digital competences - Skills Assessment Validation and Recognition Tools

Lifelong learning and the recognition of learning and skills aims at facilitating the transition between different jobs, companies, or sectors, as well as the transition from unemployment or inactivity into employment.

THE PARTNERS

Dear Reader

The VELA project has started, and the partners work hard for the VELA products.

The Manual: Analysis of the “VELA” field of action and Exploitation of Best Practices is almost ready! The partners conducted research on already developed online learning methodology and applications, to have a validated starting point to define and develop high quality and inclusive digital solutions to teach/learn.

Also, the partners conducted research educators, facilitators and VET provider driven by the necessity to boost their digital competences to facilitate the involvement of vulnerable groups in the education process.

SECOND TRANSNATIONAL PROJECT MEETING

The second transnational project meeting took place in Krakow, Poland on- October 2022. The partners had the chance to meet face-to-face once again and work on the finalisation of the Manual: Analysis of the “VELA” field of action and Exploitation of Best Practices and in the Moodle platform: Digital Accessibility to support VET educators in involving people with disabilities in e-learning.

The VELA products started to come to life. Stay tuned...

Best regards,
The VELA Team
